

Tree protection systems

Manufacturing products in cast iron is our strength – tree protection is our passion.
MeierGuss supplies the complete system incl. steel frame and concrete foundation.

MeierGuss **RONDELLO**[®] System

- well-known and established
- radial design – encloses the tree location in a circle

The Tree Protectors

Features **RONDELLO**[®]

- self-supporting cast-iron tree grating
- can be loaded up to 50kN without substructure
- more free space for the tree
- planting after installation – no problem
- grows with the tree because internal diameter can be enlarged from 700 mm to 1100 mm
- also available with opening for illumination and in special colours

	Measurements in mm	
	outside (incl. steel frame)	inside
Standard	1250 x 1250	Ø 700
	1500 x 1500	Ø 700
	1800 x 1800	Ø 700
	2000 x 2000	Ø 700
	Ø 1500	Ø 700
	Ø 2000	Ø 700

Special measurements for projects are possible on request.

Tree protection

Further designs:

MeierGuss **QUADRAL®** System

- timeless – technical – municipally robust
- QUADRAL®-Design – design – grows with the tree situation localised in a square

MeierGuss **LATERAL®** System

- modern – minimalistic – municipally sophisticated
- LATERAL®-design – grows with the tree location in parallel

MeierGuss **CLASSICO®** System

- the original with tradition – often copied, never achieved
- spotlight design – hits the tree situation right on the dot
